

To all SPAWAR Team Members, this is an update to our current situation as of 1700, Friday, 14 September.

The Navy is currently in THREATCON Charlie. SPAWAR will operate under the following conditions for Monday, 17 September:

- All military and civilian employees should report for work as scheduled.
- Vehicular traffic into the Old Town Campus will again be restricted to handicapped personnel with appropriate identification.
- Employees are requested to park in the West parking lot. Overflow parking will be available at the General Dynamics parking lot.
- Employees are encouraged to use public transportation where available. The North Turnstile will be open from 0600 to 0800 to permit entry onto the campus and open all day for personnel exiting the compound.
- The Visitor Reception Office will be open on Monday and visitors will be admitted in accordance with normal procedures.
- The Old Town Campus will be prepared to receive deliveries.
- While the Defense Department is under heightened readiness conditions, military personnel and civil servants should consider additional measures to ensure their personal safety and the safety of family members. Actions such as varying your route to work, or traveling in carpools, inspect your vehicle prior to traveling and reporting any contact by strangers who want to talk to you about security measures the Navy has taken.

This information line will be updated regularly, or you may consult the SPAWAR public web site or the SKC for additional information.

Thank you
